

Efficiency in a new size.

**Ultra-Mini PCNL
(UMP) Set**

Ultra-Mini PCNL (UMP) Set

Efficiency in a new size.

Ideal for effective and patient-friendly kidney stone treatment.

- High stone-free rate with low pressure and integrated, high-flow irrigation sheath.
- Small, 4 mm incision.
- Specially designed, state-of-the-art access sheath with water jet channel for creating turbulence of fragments and high-pressure.
- Gentle and atraumatic intervention—the small puncture causes minimal dilation of the tissue.
- Lightweight design.
- Excellent image quality and outstanding color reproduction.
