Highflow continuous irrigation
surgical sheath

Highflow continuous irrigation surgical sheath

Single continuous irrigation sheath – compact design for hysteroscopy

- Single sheath with Click-Lock quick connection for rapid assembly and additional telescope stabilization
- In combination with Richard Wolf PANOVIEW hysteroscopes from the 8974 series, 30° or 12°
- Increased flow performance compared to conventional multi-sheath systems
- Intake and drainage connections angled at 45° for easy tube installation and additional working length
- Low profile instrument port for auxiliary instruments, increasing service life and enabling sensitive work
- Atraumatic instrument tip for gentle access, especially in cases involving a stenotic cervical canal
- One-piece, compact system: ergonomic and safe to use
