core.browser

Control Software

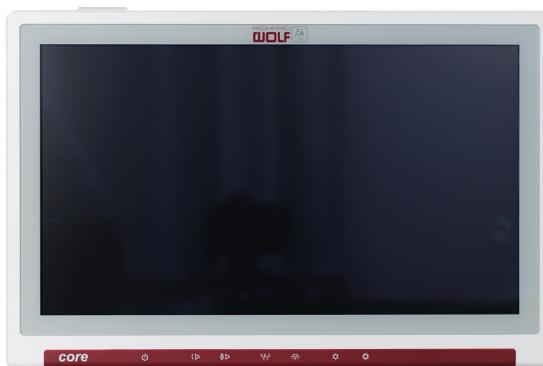

core.browser is the central operating software for the core nova system. It facilitates the display and operation of functions, device control, apps, etc.

A keyboard or a mouse is not necessary for control, since the system is operated entirely using a touchscreen.

- Clear presentation of device functions
- Display of device status
- Display of error and information messages
- Control of third-party devices like OR tables or OR lights
- Various languages available
- Presets for endoscopic devices

core.browser **5592201**

core.browser Control Terminal

core.control can be positioned at the nursing station or mounted directly on a cart or boom. Together with the installed **core.browser** it operates the **core.nova** system.

- Workstation for controlling the **core.nova** system
- User-friendly touch screen

Dimensions (w x h x d)	550 x 360 x 65 mm

core.connect

Third-Party Device Control Interface

core.connect is a universal converter interface for controlling third party devices (e.g., OR tables, surgical lights or other devices).

- Connection of third party devices via CAN bus, serial or infrared communication possible
- Power supply via Power over Ethernet (PoE) or alternatively via an external power supply unit
- A range of drivers is available (see page A 8)

Emergency Stop Module **5590.830**

Interface module for interrupting the communication connection between **core.connect** and the third party device.

Device dimensions (w x h x d): 80 x 90 x 73 mm

Weight: approx. 0.15 kg

IR Transceiver **5592504**

Interface module for controlling medical devices with infrared interface.

Power supply via connection cable from **core.connect**.

Device dimensions (w x h x d): 250 x 150 x 50 mm

Weight: approx. 0.5 kg

core.media Media Management Platform

core.media is the central media management platform in the **core** nova network. By using 3G-SDI inputs and outputs or H.264 videostreams HD signals can be transmitted from source to destination. Video sources can be documented while routing video signals.

- Digital video inputs: 3x 3G-SDI, 1x HD-SDI
- Digital video outputs: 2x 3G-SDI, 2x HD-SDI
- Incoming digital H.264 videostream
- Documentation channel up to 1080p
- Image storing of all video inputs with resolution up to 1920x1080 (depending on the input signal)
- Simultaneous video preview
- Picture-in-picture and quad split
- Plug-and-play connection to **core** nova system

core.portal Virtual Server

core.portal is the server-based central unit of the **core** nova system. It establishes the connection between the OR network and the hospital-wide IT systems.

core.portal is a server application, which is installed as a preconfigured image in a virtual environment.

- Provides various services centrally in all operating rooms
- Receiving and forwarding of patient lists via DICOM WORKLIST
- Receiving and forwarding of images and videos via DICOM STORE
- HL7 compatible
- Management of recorded images and videos via Media Archive App

core.portal **5597101**

Basic software (license valid for max. 25 OR rooms)

Requirements:

- A server providing a virtual environment with the ESXi operating system is required for the installation
- The server hardware is not included in the Richard Wolf offer, it has to be provided by the customer
- Hardware requirements for the server are available on request

OR connector **5597151**

Establishes a connection between a specific OR and the **core.portal**.

One connector is required for each OR.

core.portal Software Applications

Workflow

Checklist app **5597706**

The surgical safety checklist aims to decrease errors and adverse events as well as enhance teamwork and communication during an operation.

- WHO Checklist is assigned as standard
- Customer specific checklists can be generated by RW Service during app installation
- The app generates a PDF report, which is stored in the media archive

Requirements:

- core.portal** is required

core.portal Applications

Output modules

Fileshare module **5597203**

Allows the storage of intraoperative data to an enabled directory in the hospital's IT infrastructure.

The module is required for each fileshare folder.

Requirements:

- core.portal** is required

ELO module **5597206**

Connects to the ELO (electronic Leitz folder) office software for the transmission of recorded images.

The module must be licensed for each operating room, from which data is to be transmitted to ELO.

Requirements:

- core.portal** is required

Input module

Scheduling HL7 module **5597303**

Used for transmitting demographic patient data or surgery scheduling data from a hospital information system via HL7 messages to **core.portal**. One module is required for each message type.

Ceiling-mounted loudspeakers EXCITE IC 5 with and without cover

2-way ceiling-mounted speaker EXCITE-IC5

The 2-way ceiling-mounted loudspeakers are supplied in a dual set, white finish.

- Music power rating: 60 watts
- Impedance: 8 ohms

core.portal Room Camera

Canon room camera VB-H43

Room camera installed within the dome housing

Network camera **VB-H43**

IP network camera for installation in ORs.

Indoor dome housing **DR41-C-VB**

For indoor ceiling mounting. To be used exclusively in conjunction with network camera VB-H43

Room camera app **5597702**

Allows intraoperative control of up to 4 compatible IP room cameras installed in the same operating room. Previews are supported.

- core.portal** is required
- core.media** is required for display, transfer and recording of a videotostream
- This app is required in each operating room where an IP room camera needs to be controlled
- Only network camera VB-H43 is supported
- Network camera must be installed and configured by an authorized system integrator
- Power supply via power over ethernet
