RICHARD WOLF

spirit of excellence

Versatile. User-friendly. Integrated. **Mobile.**

core.browser 1.6

The mobile cart solution for OR integration by Richard Wolf

core.browser 1.6

The mobile cart solution for OR integration by Richard Wolf

core.browser 1.6 is the gate to the modern operating room that does not require a technical room nor a separate server rack – it runs directly on an endoscopic cart to save costs, time and space.

Data from hospital networks will be available from the convenience of the mobile endoscopic unit for assignment and revision along with intuitive and easy access to medical device operations. Captured images and videos are fully integrated into the digital workflow.

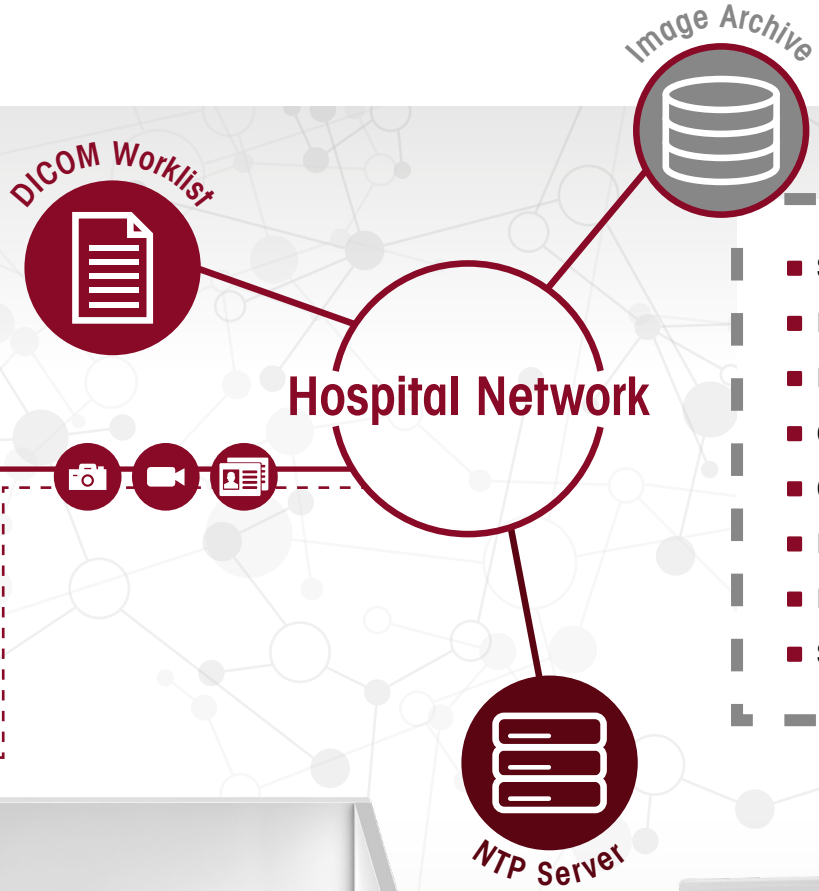
Overall, **core.browser 1.6** is a day-to-day solution that perfectly supports the OR workflow with its clarity and simplicity.

Digital Documentation:

Simple transfer of surgical images and videos to appropriate storage destinations, like image archive systems. The documentation is carried out without changing media types and offers data quality together with patient context.

RICHARD WOLF

spirit of excellence



- Serverless
- Digital workflow
- Hospital network connectivity
- Optional video routing
- Centralized device control
- Future-proof platform
- Lightweight
- Small footprint
