With Support of

Dear colleagues and surgeons,

Over the past years advanced surgical techniques for minimally-invasive esophageal surgery developed. New surgical strategies and technological innovations have driven the evolution of esophageal surgery. In Mainz the fully minimally-invasive esophageal surgery is the standard procedure beside robotic procedures.

In this masterclass workshop we would like to show essential technical steps in minimally-invasive esophageal surgery. We are looking forward to meeting you at our Masterclass Course Esophageal Surgery 2019 at our University.

Kind regards,
Peter Grimminger and Hauke Lang

UNIVERSITY MEDICAL CENTER MAINZ
Langenbeckstr. 1 · 55131 Mainz GERMANY
