spirit of excellence

The Efficient Solution for Office Hysteroscopy

The LED 50 HD II Office Imaging System enables high-quality hysteroscopic diagnostics and treatment directly in the outpatient setting – without the need for an OR or anesthesia. This compact Full HD system is ideal for office-based procedures, offering excellent image quality and intuitive handling.

- All-in-one imaging system with integrated LED light source and Full HD camera
- Optimized for office hysteroscopy – fast, reliable, and space-saving
- User-friendly operation – ideal for gynecologists in outpatient clinics or private practices
- Flexible and mobile setup for maximum convenience
- Empowering efficient diagnostics and biopsies – right in your office
